the research process

choose a topic
- decide what information you want/need to find

find sources
- identify the BEST places to find what you need
- locate and evaluate the BEST sources of information

gather information
- read / interview / watch
- pull information from sources
- take notes / write notecards

synthesize
- organize information from multiple sources
- think of new ideas related to your research

create
- present the information you found
- and your new ideas

evaluate
- reflect on your research process & product
